## Product Description

### Aluminum Foldable Electric Scooter With 350W Motor Power Front LED And Rear Brake Light

#### Product Description:

The Electric Scooter for Teenager features a disc brake type, which provides reliable and efficient braking performance. This is especially important for young riders who may be less experienced and need extra safety features to feel confident on the road. The disc brake also ensures that the scooter can come to a complete stop quickly and smoothly, which is essential for avoiding accidents.

The Electric Scooter for Teenager is also foldable, making it easy to store and transport when not in use. This feature is especially useful for young people who may need to take the scooter on public transportation or store it in a small apartment or dorm room. The foldable design also makes it possible to take the scooter on trips or vacations, so young people can explore new places and have fun while reducing their carbon footprint.

This Electric Scooter for Teenager can support a maximum loading weight of 100KG, making it suitable for most teenagers and young adults. This feature ensures that the scooter can be used by a wide range of people, regardless of their weight or size. The maximum loading weight also ensures that the scooter is sturdy and stable, providing a safe and reliable ride.

In summary, the Electric Portable Scooter for Teenager is an excellent choice for young people who want to get around quickly, efficiently, and in style. This Electric Scooter for Teenager offers a range of features that make it safe, convenient, and easy to use, including a disc brake type, a front LED light, a rear brake light, and a foldable design. With a maximum speed of 31KM/H and a maximum loading weight of 100KG, this Electric Scooter for Teenager is perfect for young people who want to have fun while reducing their carbon footprint.
