Product Description

AMS-TED-18 Blue Fat Tire EBike Aluminum Alloy Frame LED Light 48V 21Ah Hydraulic Disc Brake

Product Description:

One of the most important safety features of this Cargo Electric Bike is its hydraulic disc brake system. This brake system provides reliable stopping power, even when carrying a heavy load. The Cargo EBike is also equipped with a lithium-ion battery with a capacity ranging from 36V 10Ah to 48V 21Ah. This battery provides ample power to the electric motor, allowing for longer trips between charges. One of the standout features of the Cargo EBike is its cargo box truck, which is perfect for carrying groceries, packages, and other items. The cargo box is spacious enough to accommodate a variety of goods, and it is securely mounted to the frame of the bike for added stability. With the Cargo EBike, users can transport goods with ease, without having to worry about traffic congestion or parking issues. In summary, the Cargo EBike is a versatile and practical mode of transportation for anyone who needs to transport goods. Its sturdy construction, powerful electric motor, and reliable braking system make it a safe and efficient choice for users. With its cargo box truck, the Cargo Electric Bike is an excellent choice for delivery services, small businesses, and individuals looking for an eco-friendly alternative to traditional transportation methods.

Technical Parameters:

Front Light	LED Light
Display	LED Display
Tire Size	24 Inches
Brake Type	Hydraulic Disc Brake
Battery Capacity	36V 10Ah-48V 21Ah
Frame Material	Aluminum Alloy
Derailleur	Shimano 7 Speed
Motor Power	250-1000W
Battery Type	Lithium-ion
Color	Blue

Applications:

The Fat Tire Electric Bike features an LED display, making it easy to keep track of speed, distance, and battery life. The LED light on the front of the bike ensures maximum visibility and safety during night rides. The 24-inch tire size provides stability and balance, even when carrying heavy loads.

The motor power ranges from 250-1000W, depending on your transportation needs. The integrated controller allows for easy and convenient use of the bike, making it ideal for businesses that require quick and efficient transportation solutions.

The Fat Tire Electric Bike is perfect for a variety of application occasions and scenarios. It is ideal for last-mile delivery services, especially in crowded urban areas where traditional delivery trucks may not be practical. The bike can easily navigate through traffic and narrow streets, making it a popular choice for food delivery services, courier companies, and online retailers.

The Fat Tire Electric Bike is also great for businesses that require transportation of heavy goods, such as construction materials or equipment. The bike's heavy-duty cargo truck design makes it capable of carrying up to 350kg, making it a more cost-effective and efficient solution compared to traditional delivery trucks.

In conclusion, the Fat Tire Electric Bike from AMS is a versatile and practical transportation solution for businesses of all sizes. With its LED display, LED light, tire size, motor power, and integrated controller, it is capable of handling a variety of transportation needs. Whether you're in the business of last-mile delivery, construction, or any other industry that requires efficient transportation, the Cargo Electric Bike is a reliable and cost-effective option.
