Product Description

Off-White 20 FAT 24 Inch Aluminum Alloy 25km/H 48v Battery City Electric Ride

Product Description:

Elevate your riding experience with the NC-CARO-EBIKE, a versatile electric city bike designed to tackle various terrains with ease and style. Featuring both 20-inch and 24-inch 6061 aluminum alloy frames, this bike offers the perfect balance between durability and comfort, making it ideal for everything from urban commutes to adventurous off-road rides.

Choose between the 20-inch frame for nimble, urban maneuverability or the 24-inch frame for enhanced stability and comfort on rougher terrain. Both options utilize high-strength 6061 aluminum alloy, ensuring a robust and lightweight structure that stands up to diverse riding conditions. The Kenda 20x2.4 and 24x2.3 tires are designed to deliver superior grip and comfort. These wider tires offer exceptional stability and absorb shocks effectively, making them perfect for uneven surfaces and off-road adventures. Equipped with 160mm G3 disc brakes, the NC-CARO-EBIKE ensures reliable stopping power. This advanced braking system is suited for high-speed riding and varied terrain, providing the control and safety you need for confident cycling.

When fully assembled, the bike measures 1950mm x 720mm x 1150mm, offering a stable and comfortable ride. Despite its robust build, it remains versatile and compact, fitting seamlessly into your lifestyle. With an impressive Pedal Assist System (PAS) range of over 60 kilometers, the NC-CARO-EBIKE is ideal for long-distance commutes or extended outdoor excursions. Its top speed of 25km/h meets many local regulations, ensuring safe and legal riding across various regions. Choose between the 48V 10Ah frame-mounted battery or the 48V 15Ah rear-mounted battery for extended range. The larger battery provides even more power, allowing you to cover greater distances without frequent recharging. The Naici Sine Wave Controller ensures a smooth and efficient power delivery, enhancing your riding experience. This advanced controller optimizes motor output for a comfortable and reliable ride, no matter where you go. The NC-CARO-EBIKE is engineered for those who demand versatility, power, and comfort. With its durable frame options, powerful motor choices, and long-lasting battery, this electric city bike is designed to meet the needs of urban commuters and off-road enthusiasts alike. Embrace the freedom to explore with confidence and style, and make every ride a pleasure with the NC-CARO-EBIKE.

Max Speed	25km/h
Net Weight	38kg
Motor	250W / 350W / 750W
Battery type	Frame LG Rear LG
Battery Capacity	Frame 48V 10Ah Rear 48V 15Ah

Applications:

Discover the NC-CARO-EBIKE Electric City Bike, designed to elevate your urban mobility with its powerful features and robust build. Whether you're navigating city streets or exploring rugged trails, this bike offers a blend of performance and comfort tailored to diverse riding needs.

The NC-CARO-EBIKE is available with two frame sizes to cater to different riding preferences:

20-inch 6061 Aluminum Alloy Frame: Ideal for city commuting and smaller riders, this frame offers excellent durability and lightweight performance.

24-inch 6061 Aluminum Alloy Frame: Perfect for those seeking extra stability and comfort, this larger frame size enhances ride smoothness and control, making it suitable for both urban and off-road adventures.

Equipped with Kenda 20x2.4 and 24x2.3 tires, the NC-CARO-EBIKE ensures a comfortable ride across various terrains.

The wider tires provide superior grip and cushioning, making it easy to handle uneven surfaces and off-road conditions while maintaining stability and comfort. Featuring 160mm G3 disc brakes, this bike delivers strong and reliable braking performance. The advanced disc brake system is designed for high-speed riding and diverse terrains, ensuring you can stop confidently and safely under various conditions. With a size of 1950mm x 720mm x 1150mm, the NC-CARO-EBIKE offers ample space for a comfortable ride. The spacious design accommodates various rider sizes and provides a relaxed riding posture, enhancing overall comfort during extended journeys. In Pedal Assist Mode (PAS), the NC-CARO-EBIKE offers an impressive 60km range, making it suitable for long commutes and extended off-road excursions. The bike's top speed of less than 25km/h ensures compliance with urban speed regulations while providing sufficient speed for efficient travel. Weighing in at 38kg, the NC-CARO-EBIKE is built with a robust frame and components, including a substantial battery and motor. The heavier build ensures stability and durability, making it ideal for challenging terrains and consistent use. Choose from 250W, 350W, or 750W motor options to tailor the bike's performance to your needs. The 750W motor provides extra power for more demanding trails, while the 250W and 350W options are perfect for city commuting and moderate terrain.

The NC-CARO-EBIKE offers two battery configurations for extended range:

Frame LG 48V 10Ah Battery: Positioned on the frame for balanced weight distribution and reliable performance.
Rear LG 48V 15Ah Battery: Located at the rear for enhanced range and longer rides, ideal for those needing extra mileage.

The bike features a Naici Sine Wave Controller, which ensures smooth and efficient control of the motor. This advanced controller enhances the riding experience by providing stable power output and improved ride comfort. The NC-CARO-EBIKE is perfect for a variety of applications, from daily city commutes to adventurous off-road rides. Its versatile design and robust features make it a reliable choice for anyone seeking a durable and efficient electric bike.

The NC-CARO-EBIKE Electric City Bike combines power, versatility, and comfort to meet the demands of both urban and off-road riding. With its durable frame, impressive range, and powerful motor options, it offers a dependable and enjoyable riding experience. Enhance your urban mobility and embrace adventure with the NC-CARO-EBIKE – your ultimate electric bike solution.

Customization:

The NC-CARO-EBIKE offers a choice of 20-inch or 24-inch 6061 aluminum alloy frames, providing strength and durability for various terrains. It features Kenda 20x2.4 or 24x2.3 tires for excellent grip and comfort.

Equipped with 160mm G3 disc brakes, it ensures strong braking performance for both high-speed and off-road riding. The bike has unfolded dimensions of 1950mm x 720mm x 1150mm and offers a range of over 60 km in Pedal Assist System (PAS) mode.

With a top speed of less than 25 km/h, it meets urban speed regulations. The bike is powered by a 250W, 350W, or 750W motor and comes with a choice of 48V 10Ah frame battery or 48V 15Ah rear battery, providing ample range and power. It weighs 38 kg, reflecting its robust build.

The Naici sine wave controller ensures smooth and efficient motor control. Minimum order is 10 units, with a delivery time of 40-50 days.
