45km/H High Speed 26inch 6061 Aluminum Alloy Frame 36V Battery Light Dark Road E-Bike

Product Description:

The NC-GLI-M road electric bike is built for riders who demand both speed and endurance. Featuring 160mm G3 disc brakes, this bike guarantees precise stopping power, ensuring safety even at high speeds. Whether you're navigating bustling city streets or challenging mountain trails, these brakes offer superior control and reliability, making every ride smooth and secure.

At the heart of the NC-GLI-M is its powerful 250W/350W motor, which provides a responsive and exhilarating ride. You'll be able to reach up to 45km/h, perfect for fast-paced city commuting or weekend getaways. The bike's dual motor options allow you to choose the right balance between speed and torque, ensuring that even steep hills are no match for your riding ambitions.

Equipped with a 36V 10Ah frame battery and an optional 36V 14Ah seat post battery, this road e-bike can keep you moving for up to 60 kilometers on a single charge. Whether you're commuting to work or exploring new routes on your days off, the extended battery life means less time worrying about recharging and more time enjoying the journey. Plus, with Pedal Assist System (PAS), you can maximize your range, letting the bike's smart technology do some of the work for you.

Constructed from durable 6061 aluminum alloy, the NC-GLI-M frame strikes the perfect balance between lightweight convenience and robust durability. The strong aluminum design not only ensures a comfortable ride but also enhances the bike's longevity, making it the perfect companion for both urban commutes and off-road adventures. Combined with 26-inch Kenda tires—known for their superior grip and smooth ride quality—you'll experience excellent stability on any terrain.

Measuring 1890mm in length, this bike offers a streamlined design that delivers a comfortable, ergonomic riding position. Despite its sturdy build and powerful components, the bike weighs in at just 25kg, making it highly portable without sacrificing performance.

In conclusion, the NC-GLI-M is more than just a road bike—it's a powerful, efficient, and versatile transportation solution. Whether you're an urban commuter looking for speed and efficiency or an adventurer seeking thrilling weekend rides, the NC-GLI-M electric bike delivers on all fronts. With its combination of high performance, advanced safety features, and smart energy management, this bike is ready to take you wherever you need to go, with confidence and style.

Max Speed	45km/h
Net Weight	25kg
Motor	250W/350W
Battery	Frame 36V 10Ah / Seat Post 36V 14Ah
Light	No

Applications:

The NC-GLI-M Electric Road Bike is designed for riders who demand speed, performance, and reliability in a sleek, urban-friendly package. Its features ensure a comfortable and efficient ride, whether you're navigating city streets or cruising through the countryside.

The 20-inch 6061 Aluminum Alloy frame offers an ideal combination of strength and lightness. Built for both city commuting and off-road adventures, this material ensures durability without adding unnecessary weight. The frame provides a solid foundation, capable of withstanding the rigors of everyday use, while being light enough for quick handling and maneuverability. This makes it perfect for busy urban settings where agility is key, as well as for longer trips where endurance is essential.

Equipped with Kenda 26x2.1 tires, this bike is prepared for any terrain. The 26-inch size ensures smooth and stable riding, while the 2.1-inch width provides excellent grip and shock absorption. Whether you're riding on paved roads, gravel paths, or uneven trails, these tires offer the perfect balance of comfort and control. Riders will appreciate how easily the bike handles in both urban and rural environments, adapting to different surfaces and weather conditions without compromising safety or comfort.

Safety is a top priority, and the 160mm G3 Disc Brake system delivers. This high-performance braking mechanism ensures that you can stop quickly and smoothly, even when traveling at higher speeds. Whether you're navigating traffic, descending steep hills, or cruising at full throttle, the disc brakes provide the confidence you need to ride with peace of mind. With precision control, these brakes perform exceptionally well in both dry and wet conditions, making them ideal for urban commuters and long-distance cyclists alike.

The NC-GLI-M's dimensions, 1890mm x 730mm x 1140mm, make it a perfect fit for riders seeking a well-balanced, comfortable ride. The frame is spacious enough to ensure a relaxed posture without feeling too bulky. This thoughtful design provides ergonomic comfort during longer journeys while maintaining the compactness needed for city commuting.

With a PAS range of over 60km, the NC-GLI-M excels in long-distance capabilities. The Pedal Assist System (PAS)

allows riders to cover more ground with less effort, making it ideal for those who need to travel farther without feeling exhausted. Whether it's a daily commute or a weekend adventure, the bike's impressive mileage means you can focus on enjoying the ride without constantly worrying about recharging.

Capable of reaching speeds of up to 45km/h, this road bike is built for speed. Whether you need to get to work quickly or enjoy the thrill of fast-paced riding, the NC-GLI-M ensures that you'll arrive at your destination efficiently. The high-speed capability makes this bike a perfect choice for urban dwellers who want to cut down on commute times, all while enjoying the freedom and flexibility that an electric bike offers.

The NC-GLI-M comes with 250W or 350W motor options, allowing riders to choose the power output that best fits their riding needs. The 250W motor is perfect for those who prioritize efficiency and a smooth ride, while the 350W motor offers more power for tackling steeper inclines or for riders who prefer a more vigorous cycling experience. The bike offers two battery options: a 36V 10Ah frame-mounted battery and a 36V 14Ah seat post-mounted battery. Both options provide substantial power, but for those looking to push their range even further, the 14Ah battery is the clear choice, offering longer rides between charges. This dual-battery setup makes the NC-GLI-M adaptable for both daily commuting and longer excursions, ensuring that you can travel with confidence, no matter how far your destination may be.

In conclusion, the NC-GLI-M Electric Road Bike is an outstanding choice for riders looking for a versatile, high-performance bike that combines speed, safety, and convenience. Whether you're a city commuter, weekend road warrior, or someone who loves the thrill of fast, efficient travel, this bike delivers on every front. Its robust frame, long-range battery, and powerful motor options make it the perfect companion for anyone looking to elevate their riding experience.

### Customization:

Originating from China, our NC-GLI-M Road Electric Bike is built with a premium 20-inch 6061 aluminum alloy frame, offering a strong yet lightweight structure perfect for both city commuting and mountain rides. Equipped with a powerful 36V 10Ah frame battery and an optional 36V 14Ah seat post battery, it ensures extended range and reliability for your daily journeys.

The Kenda 26\*2.1 tires provide excellent traction and comfort on a variety of terrains, while the 160mm G3 disc brakes guarantee responsive and safe braking even at high speeds. The bike's motor offers flexibility, with 250W or 350W power options to suit different riding preferences.

With a maximum speed of 45 km/h and a pedal-assisted range exceeding 60 km, this e-bike is designed for long-distance travel and fast commutes. Its total weight of 25 kg strikes a balance between performance and portability.

Our minimum order quantity is 10 units, with a delivery time of 40-50 days. Contact us today to customize your NC-GLI-M Road Electric Bike.
