## Product Description

### TurboRide 6.5-Inch Electric Scooter For Kids With 200W Motor And 3 Speed Settings

#### Product Description:

With a product size of 108 x 93 x 53 x 65 cm, these scooters are perfectly proportioned for children, ensuring both comfort and control while riding. The scooters are powered by a 200W brushless motor that provides smooth acceleration and the ability to reach speeds suited for young adventurers.

Charging the JLYD001 scooters is a breeze, taking just 3 to 5 hours for a full charge, enabling a range of 6 to 8 km on a single charge, allowing for extended fun without frequent recharging. The scooters operate on a 36V system with battery options of 3.0/3.6Ah, with labels indicating higher capacities of 4.0/4.4/4.8Ah, catering to different riding needs.

Safety is paramount in the design of these scooters. The frame is constructed from durable iron and plastic, ensuring sturdiness while keeping the overall weight manageable for young riders. The rear wheels are made of PU material with lights, providing visibility and adding a fun element to every ride.

Each scooter features three speeds to accommodate various skill levels and a power display that keeps kids informed about battery status. Safety gear such as a helmet and knee pads are included to promote safe riding practices.

Additional features include Bluetooth connectivity, a horn, and bottom lights, enhancing the overall riding experience.

Designed for maximum enjoyment, these scooters can support a maximum load of 60 kg, making them suitable for a wide range of children. When it comes to shipping, these scooters are packaged in cartons measuring 68.5 x 50 x 21 cm, allowing for efficient storage and transport.

For bulk purchases, the loading capacity is impressive, with 376 pieces for a 20FT container, 790 pieces for a 40GP container, and 930 pieces for a 40HQ container.

#### Technical Parameters:

Children Electric Scotter	
Product Size	108 x 93 x 53 x 65 cm
Charging Time	3 - 5 hours
Range	6 - 8 km
Voltage	36V 3.0/3.6Ah (Label: 4.0/4.4/4.8Ah)
Motor	200W brushless
Frame Material	Iron + Plastic
Rear Wheel	PU with light
Max Load	60 kg
Carton Size	68.5 x 50 x 21 cm

#### Applications:

##### Dimensions and Design

Measuring 108 x 93 x 53 x 65 cm, this ride-on vehicle is perfectly sized for young adventurers. Its sturdy construction is made from a durable combination of iron and plastic, providing a safe yet lightweight ride. The sleek design not only appeals to children but also promotes easy handling for parents during storage and transport.

##### Powerful Performance

Equipped with a robust 200W brushless motor, this electric ride-on delivers smooth acceleration and efficient operation. The vehicle is powered by a 36V battery, with options ranging from 3.0Ah to 4.8Ah, allowing for varying performance based on your child's needs. With a charging time of just 3 to 5 hours, your little one can get back to riding in no time!

##### Range and Speed

This ride-on vehicle offers an impressive range of 6 to 8 km on a single charge, perfect for neighborhood adventures or trips to the park. With three adjustable speeds, your child can cruise at their comfort level, promoting confidence and skill development as they learn to navigate their surroundings.

##### Safety Features

Safety is our top priority. The ride-on comes equipped with essential safety features, including a helmet and knee pads to protect your child while they explore. The PU rear wheels are designed with built-in lights to enhance visibility during evening rides, ensuring that your child stands out and stays safe.

##### User-Friendly Specifications

The vehicle boasts a variety of user-friendly features, such as a power display to monitor battery levels, Bluetooth connectivity for fun audio experiences, and a horn for signaling to others. Additionally, the bottom light adds an extra layer of visibility and flair to the ride, making it both practical and exciting.

##### Maximum Load and Carton Size

Designed to accommodate a maximum load of 60 kg, this ride-on vehicle is suitable for a range of children. It comes packaged in a carton size of 68.5 x 50 x 21 cm, making it easy to transport and store when not in use.

##### Container Loading Quantities

For businesses and retailers, this electric ride-on vehicle is a smart choice. The container loading quantities are efficient, with room for 376 pcs in a 20FT container, 790 pcs in a 40GP, and an impressive 930 pcs in a 40HQ, making it ideal for bulk purchases.

#### Customization:

his electric ride-on car is designed for children aged 6 years and above, featuring a robust frame made from iron and

plastic, ensuring both durability and a lightweight build. With a compact product size of 108 x 93 x 53 x 65 cm, it is perfect for young drivers. The powerful 200W brushless motor provides smooth performance, while the 36V battery offers options of 3.0Ah, 3.6Ah, and higher capacities for extended playtime, with a charging time of just 3 to 5 hours. Equipped with three speed settings and a power display, this ride-on car ensures safe and controlled driving. Additional features include a helmet, knee pads, Bluetooth connectivity for music, a horn for alerting pedestrians, and bottom lights for enhanced visibility. The rear wheel is made of PU with lights for added fun. With a maximum load capacity of 60 kg, this vehicle is perfect for kids, combining safety and enjoyment. It can be efficiently packed for shipping, with carton dimensions of 68.5 x 50 x 21 cm, allowing for a loading quantity of 376 pieces in a 20FT container, 790 pieces in a 40GP, and 930 pieces in a 40HQ.
