Product Description

Product Description

The LEE955 Electric Mountain Bike combines innovation and style, making it a standout choice for adventurers. Crafted from high-quality 6061 aluminum alloy, this bike is both lightweight and sturdy, designed to handle challenging terrains with ease. It features a robust rear hub motor delivering 1500W of power, providing exhilarating performance and effortless climbs. The hydraulic suspension fork enhances comfort, adapting to rough trails while the 26" x 4" tires offer excellent traction on various surfaces. Equipped with a Shimano Tourney 7-speed gear system, riders can easily shift gears for optimal performance. The easy-to-read LCD display provides real-time data on speed and battery status. With a 60V/20Ah battery offering a range of 110-130 km, the LEE955 is perfect for extended outdoor excursions.
