Brushless Geared Electric Mountain Bike**

## Product Description

### Product Description:

An Electric Two Wheeler Bike is a fantastic option for those looking for an eco-friendly and convenient mode of transportation. One such impressive model is the Electric Mountain Bike, featuring a battery voltage of 36V that provides ample power to tackle various terrains with ease.

The Electric Mountain Bike offers a quick charge time of just 3.5 hours, allowing you to spend more time riding and less time waiting for your bike to be ready. The 36V controller equipped with a PAS sensor ensures smooth and efficient power delivery, making your rides enjoyable and effortless.

Weighing in at 45kgs, this Electric Two Wheeler Bike strikes a good balance between sturdiness and maneuverability. The front suspension fork adds to the bike's versatility, absorbing shocks and providing a smoother ride over bumps and rough surfaces.

Whether you are an avid mountain biker looking for an extra boost or someone interested in exploring the outdoors in a more sustainable way, the Electric Mountain Bike is a reliable companion. With its powerful 36V battery and efficient PAS sensor, you can ride longer and farther without worrying about running out of power.

Thanks to its front suspension fork, this Electric Two Wheeler Bike can handle different types of terrain, from rocky trails to city streets, ensuring a comfortable and stable ride throughout your journey. The 45kgs gross weight of the bike offers stability and durability, making it suitable for various riding conditions.

Experience the thrill of riding an Electric Mountain Bike and discover the convenience and excitement of an Electric Two Wheeler Bike. With a 36V battery voltage, 3.5-hour charge time, 36V controller with PAS sensor, 45kgs gross weight, and front suspension fork, this bike is designed to meet your needs for adventure and sustainability.
